## PROJECTS

### 1Billion

Full Stack Web Application

June 2023

- Founded and led the development of 1Billion, an avant-garde MERN (MongoDB, Express, ReactJS, and Node JS) -based startup launched within the college campus.
- Introduced a groundbreaking concept catering to the food delivery market, delivering convenience and choice to students and faculty.
- Implemented stringent security protocols, utilizing secure credential storage and robust encryption algorithms to safeguard user data.
- Orchestrated seamless deployment on scalable servers, ensuring optimal bandwidth management and uninterrupted service availability.

### i-NoteBook

Full Stack Web Application

April 2023

- Developed iNoteBook, a secure MERN(MongoDB, Express, ReactJS, and Node JS) stack application enabling user authentication and note management.
- Implemented JWT token-based authentication and bcrypt.js for enhanced data security and encryption.
- Utilized Context API for state management, eliminating the need for external libraries like Redux.
- Enabled users to create, update, and delete notes, ensuring a seamless and personalized note-taking experience.

### NewsApp

Full Stack Web Application

January 2023

- Developed a Daily NewsApp using MERN(MongoDB, Express, ReactJS, and Node JS) stack, offering diverse news sections for seamless reading.
- Created a user-friendly interface for browsing and accessing daily news across various categories.
- Implemented real-time updates and notifications, enhancing the user experience for staying informed.
- Integrated NewsAPI to seamlessly fetch daily news from multiple reliable sources.
